PRESS RELEASE

Sunday Mornings at the Museum of Mineralogy

“Sunday Mornings at the Museum of Mineralogy” is a beloved event for your whole family that will take place on Sundays 20th, 27th of November and 4th of December 2016, from 10:00 a.m to 14:00p.m. Take your whole family and experience an amazing educational day through activities and free tours in the wonderful world of minerals and rocks, which is organized by the Museum’s scientific staff and will take place at the Museum of Mineralogy.

You’ll be enchanted by the beauty of gemstones, the fluorescent minerals, the particularity of meteorites and the secrets of volcanoes. Our young friends will have the opportunity to take part in new interactive activities that will help them learn through play. They’ll create their own crystals, test their knowledge, explore the wild beauty of volcanoes and feel the rush gold diggers once felt by sifting through the sand to find their own crystals (which they’ll take along home at the end).

Moreover, for the 5th consecutive year, the “Mineral Exhibition of Greek Collectors” will be simultaneously carried out with minerals originating around the world.

Entrance and activities are free of charge
